

Power Worker – indispensable in the workshop.

Power Worker: Sharp-edged drilling chips are its speciality. The BDS Power Worker is there when there is a risk of injury - always and everywhere. Easily and safely it removes the drilling chips with magnetic power.

- ▶ Collecting
- ▶ Pushing off
- ▶ Done

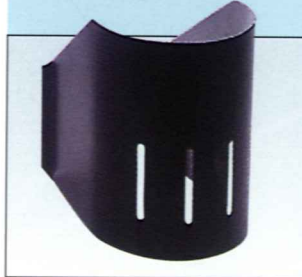

It is obvious that the power of the Power Worker can also be used to remove metals from unapproachable positions, and the key under the lathe comes to the surface again.

Power Worker	
Order No.	POW 100

Chip protection for Magnetic Core Drilling Machines

Application: Chip protection for BDS Magnetic Core Drilling Machines, detachable

Order No. **ZSS 050**

Suitable for: Series
MAB 100 -
MAB 480

Order No. **ZSS 500**

Suitable for: Series
MAB 500 -
MAB 850

Hot, razor-sharp drilling chips are collected by the strong magnet...

... and wiped off over the scrap metal container by actuating the mechanics without any risk of injury.

All iron chips fall off immediately and completely.

The BDS Power Worker also very useful when picking up screws or other metal parts.
